DESCRIPTION OF EQUIPMENT

The transmitter on 7 or 14 mcs. in the Hall used an 813 with an input of 100 watts plate modulated by pp 807s. The aerial consisted of a half wave 3.5 mcs end fed zepp. Because of the high noise level in the Hall, the receiver was located 2 miles away and was tuned from the Hall by means of 2 tones sent over a 144 mcs. VHF link, the receiver's output being relayed to the Hall over same link. Three CRO tubes displayed the carrier, AF and modulated envelopes.

DETAILS OF RADIO CONTACT with _____ Your phone signals were R _____ S _____
in the City Hall at _____ on _____ January 1954. Thank you for your co-operation.
