

to me & he certainly was not from the Johannesburg district & the animal on the end of the top was who is next to Jack Walker is definitely 75H grade Hektor, I know him personally & visited him in the Royal Hektor hospital - only a couple of weeks before he died.

Saw the of UK's listed in the 1933 coll book 3

had known 19 of them - they were the days -

I played records on the B/C band from the

3rd February until the 8th Sept. 1935 but then my

mother became ill & eventually died & that ended

that, all my old gear was scrapped & I moved into

a boarding house with a 245 accumulator & a two

scale record. All the gear in the old photo em-

board was later built into my room there & a 67' and

fed antenna was used.

I know practically all the names of those in

the big group on the page but I'm afraid my

memory is not what it used to be & it would take

a few of the old times to get together to work it out

I'm sorry I dropped out of my old coll book. I've

only got a 1932/3 one now.

Well I've at least answered your letter as far as

anything from me - like I have - & again many

thanks for the photo data you sent.
