

Wireless Institute of Australia

NEW SOUTH WALES DIVISION.

THE twelve months which have just elapsed have been epoch-making ones in the history of the Institute. Much effort has been expended and much has been accomplished. The council has worked untiringly in the interests of the experimental movement, and many hours of patient labour are expected to bear fruit at an early date. Of the papers and lectures which have been presented before this division, only one thing can be said; they have been excellent throughout. Radio enthusiasts will remember with pleasure Mr. Alec Hector's lecture on "Colour Music," and the fact that he has promised to give another lecture at an early date under the auspices of the Institute, augurs well for the future. Two things stand out prominently in the year's proceedings, the Wireless and Electrical Exhibition in the Sydney Town Hall, and the affiliation of the various radio clubs of N.S.W. with this division. The exhibition was a complete success in every way and of-

ficials are still busy answering enquiries concerning the organisation, which have come from all parts of the world. With regard to the Affiliation Scheme little need be said, as it is recognised on all sides that this is one of the great turning points in the experimental movement in N.S.W. The retiring council is to be congratulated upon the progress which the Institute has made during the past twelve months and the best wishes of all are extended to the new members.

The new offices of the division are situated on the second floor, 82 Pitt Street, Sydney, and all enquiries concerning the Institute's activities will be welcomed. Address all communications to Box 3120, G.P.O., Sydney.

The following officers have been elected for the next twelve months:—

Pres., C. D. MacLurcan, Vice-Pres., F. Basil Cooke, H. A. Stowe; Hon. Treas., O. F. Mingay; Hon. Sec., Phil Renshaw; Council, S. V. Colville, W. H. Newman, R. C. Marsden, E. B. Crocker; Publicity Officer, A. H. Perrett. A meeting of the delegates' council of the clubs affiliated with the Wireless Institute will be held at the offices on May 27, at 7.30 p.m. sharp. All clubs that have completed their bonds of affiliation are entitled to take part through their delegate.

Amateur Transmitting Licenses Issued During March, 1924

Columbia "A", "B" and "C" Radio Batteries

The most satisfying and profitable Radio Batteries you can sell

Advertised all over the world.

COLUMBIA Radio Batteries are the result of constant study and experimenting in the largest laboratory of its kind in the world. They have been accepted everywhere as absolutely the best radio batteries made and they will give far more satisfactory results than any others. They will sell quickly and yield a good profit.

COLUMBIA Dry Cell Radio "A" Batteries are made especially for dry cell vacuum tubes and will greatly outlast any other type of ignition battery for this purpose.

COLUMBIA Storage "A" Batteries for vacuum tubes of one-half ampere or over have many characteristics which make them ideal for such use. They are shipped dry and charged as sold, thus always assuring a new, fresh and powerful battery.

COLUMBIA "B" Batteries are made in 22½ and 45-volt sizes. They are powerful and long lasting. Thoroughly insulated and waterproofed and furnished with Fahnestock Spring Clip Connectors.

COLUMBIA "Three" Batteries are suitable for use as an "A," "B" or "C" Battery. They are made of extra large sized cells and last unusually long time.

Write for an illustrated, descriptive circular.
