Cups awarded Z4AA and Z4AG.

AN event unique in the wireless history of N.Z. occurred at the re-opening of station 3AC, Christchurch, recently, when the "presentation" by wireless of cups awarded Mr. F. D. Bell, of station 4AA, and Mr. R. Slade, of station 4AG, was made from station 3AC.

The cups were awarded Messrs. Bell and Slade for being the first two amateurs in the Dominion to establish two-way communication with England. Both these amateurs reside in Otago, and as they are both over 200 miles distant from the nearest centre concerned in the awarding of the cups, the question arose as to how they could be presented. Finally the question was solved by the cups being sent through the post, and the gentlemen concerned being requested to listen-in at the re-opening of the station of the Radio Society of Christchurch, 3AC.

The cups are of silver, with suitable ebony stands, and are about five inches high. The inscription on the cup awarded Mr. Slade reads:—"Presented to R. Slade, 4AG, by the Radio Society of Christchurch, Wanganui Amateur Radio Club, and New Zealand amateurs, in recognition of his two-way communication with Great Britain, October, 1924." The inscription on the other cup is similar.

The Mayor of Christchurch (Rev. J. K. Archer) made the presentation speech, which was broadcast from station 3AC along with the rest of the proceedings, on a power of 50 watts.

Mr. F. D. Bell was unavoidably absent from his station; but 4AG sent out a message conveying warmest thanks and appreciation on behalf of stations 4AA and 4AG.
