

POSTMASTER-GENERAL'S DEPARTMENT

OUR REFERENCE: TW.15/5/33

General Post Office, Hobart, Tas.

Telephone 2 0511 Extension 201.

1st February, 1961.

Dear Sir,

In accordance with your recent application, enclosed is Ship Station Licence No. T.233 which authorises the establishment of a radicomunication station in your vessel., "MOORINA".

The license is issued subject to the conditions outlined in the attached publication(s) entitled:-

"Conditions governing the licensing and operation of voluntarily fitted ship stations for communication with coast stations of the Overseas Telecommunications Commission".

"Conditions governing the licensing and operation of Ship Stations restricted to Intercommunication between Vessels".

The equipment approved for use by your station is HARRISSON, C.H. 2 (as per the circuit diagram attached) which is a type classified as standard equipment in the list of equipments approved by this Department as suitable for licensing purposes, and an indication to that effect has been included on the licence.

You are reminded of the need to obtain the Department's prior approval before any change is made in the type of equipment authorised or any other variation in the conditions under which the station is licensed.

As indicated in item 1 of the license, the call sign allotted to your station is VM4103

Will you kindly communicate with the Radio Inspector, Hobart (Telephone 2 0511 Extension 331) who will make arrangements with you for the necessary frequency accuracy test of your transmitter which must be effected by the Department before the station commences.

As indicated in Section 10 of the enclosed document (Form RD36A), it is necessary for the operator of the station to qualify for a Third Class Certificate in Radiotelephony/Radiotelegraphy (which must be endorsed for the type of equipment to be installed in the vessel) before the station may be used for the exchange of traffic with coast stations of the Overseas Telecommunications Commission. The conditions under which such a certificate may be obtained are outlined in Appendix 8 of the enclosed Handbook for ship station operators.

Yours faithfully,

Aw Munro

for Superintendent,
Telegraph Service and Radio Branch

Mr. C. Harrison,
88 Giblein Street,
LENAH VALLEY.
