VK70TC is on the site of coast radio station, VIH, which opened in 1912 in time to communicate with Mawson's expedition to Macquarie Island and Antarctica. VIH closed in 1992. The original 5 KW spark transmitter was replaced by a 2 KW valve in 1926. VIH was operated by the PMG, RAN, AWA and finally the Overseas Telecommunications Commission, hence our call sign VK70TC.

VK70TC is on the site formerly used by coastal radio station VIH, which opened in 1912 in time to communicate with Mawson's expedition to Macquarie Island and Antarctica. VIH closed in 1992. Originally equipped with a 5 KW spark transmitter and crystal receiver, in 1924 it was using a De Forest ultra-audion receiver and in 1926, a 2 KW valve transmitter. VIH was operated by the PMG, RAN, AWA and finally by the Overseas Telecommunications Commission as commemorated by our call sign VK70TC.
